NOTE: This proclamation will be published in the *Federal Register* on February 7.

### **Message to the Congress on Trade With Armenia**

*February 3, 1995*

*To the Congress of the United States:*

The Generalized System of Preferences (GSP) program offers duty-free treatment to specified products that are imported from designated beneficiary countries. It is authorized by the Trade Act of 1974, as amended.

I am writing to inform you of my intent to add Armenia to the list of beneficiary developing countries for purposes of the GSP program. I have carefully considered the criteria identified in sections 501 and 502 of the Trade Act of 1974. In light of these criteria, I have determined that it is appropriate to extend GSP benefits to Armenia.

I am also writing to inform you of my decision to terminate the designation of The Bahamas and the designation of Israel as beneficiary developing countries for purposes of the GSP program. Pursuant to section 504(f) of the Trade Act of 1974, I have determined that the per capita gross national products of The Bahamas and of Israel have exceeded the applicable limit provided for in section 504(f). Accordingly, I have determined that it is appropriate to terminate the designation of The Bahamas and Israel as GSP beneficiaries.

This notice is submitted in accordance with sections 502(a)(1) and 502(a)(2) of the Trade Act of 1974.

**William J. Clinton**

The White House,  
February 3, 1995.

### **Letter to Congressional Leaders Transmitting the Report on Science, Technology and American Diplomacy**

*February 3, 1995*

*Dear Mr. Speaker: (Dear Mr. Chairman:)*

I am pleased to transmit this annual report on Science, Technology and American Diplomacy for fiscal year 1994, in accordance with Title V of the Foreign Relations Act of Fiscal Year 1979, as amended (Public Law 95-426; 22 U.S.C. 2656c(b)).

Prevention and resolution of conflicts that threaten U.S. interests continues to be a key goal of U.S. foreign policy. National and regional stability, broadly defined, are preconditions for the growth of democracies, economies, and markets. By supporting international science and technology collaborations, the United States has reaped significant economic benefits, promoted goodwill, and helped maintain the peace.

The 1994 Title V report describes the role of international science and technology cooperation in the implementation of U.S. policy. As in previous years, the report focuses on a few selected areas of science and technology cooperation of particular importance to the United States, in addition to the detailed country narratives.

The report reviews the steps U.S. agencies take to advance U.S. technology and competitiveness interests through international efforts. These fall into three broad categories: monitoring foreign science and technology developments; conducting strategic international collaborative initiatives and programs to take advantage of opportunities for mutual gain, sometimes done in conjunction with the private sector; and the elimination of international barriers that impede technology development or trade. International collaboration in science and technology is also critical to U.S. efforts to help address population stabilization and the improvement of women's health. The 1994 Title V report provides an in-depth description of efforts underway in U.S. agencies to address these broad themes.

We face the challenge of seeking greater world stability at a critical time in our history. Finding creative solutions to global problems
